

# The United Arab Emirates

## CULTURAL DIFFUSION

Physical environment in the UAE can affect cultural diffusion.

First, it's coastal to Pakistan, and it's easy to go to on the Persian Gulf. India is the UAE's top migrators. But no farmland is there. This limits cultural diffusion.

## FUN FACT

In Dubai, it has the world's tallest tower, Burj Khalifa.

## TRADE PATTERNS

Physical environment can also affect trade. Since the UAE can't grow food, they produce oil and sell it for food. Since they can't farm, they can't trade for that. Trade is constantly affected by physical environment.

## ECONOMY

Physical Environment can also affect the economy. The UAE has oil for days, because they're in the middle east. so they provide half of the worlds oil. When they sell it, they get cash. They use the money to build big towers, and hotels, just for tourism. Economy can be deeply affected b physical environment.
